Communication

Team Management

Oracle SQL

Leadership

PERSONAL PROJECTS

Blog Application (05/2020 – 05/2020)

- Blog Application uses Google's Firebase Authentication, Realtime database and Storage features. User have to create account and login in order to use the service of application. User can post and share the post through different platforms to other users.

Grocery app (05/2020 – 05/2020)

- Worked on real project which uses Firebase Firestore to store user's data on cloud. This app keeps tracks of users daily expenditures and provides the day to day estimate of expenditure. While working on this project I learned Database and cloud storage.

Student Management System Using Java (10/2019 – 10/2019)

- Worked on project Student library management which is used to keep student track of students transaction of library like issuing, returning of books.
